You will receive one of three approved vaccines, depending on the site:

PFIZER (TWO DOSES)

MODERNA (TWO DOSES)

JOHNSON & JOHNSON (ONE DOSE)

- **You will have your second vaccine three weeks after your second vaccine.**
- **Most people have only a mild reaction to their vaccines. This may include fatigue, headache, and a slight fever, and soreness in the arm where the injection was given.**
- **Do not be alarmed. This means your body's natural immune system has been activated to fight off any pathogens.**
- **It is extremely rare that anyone has more serious reactions, like difficulty breathing, but if you do, seek medical attention immediately.**
